FRIENDSHIP AND FOLLY: THE MERRIWEATHER CHRONICLES BOOK I BY MEREDITH ALLADY PDF

Avoid Buyer's Remorse! Are you thinking of purchasing this book, or even using one of your precious Amazon Prime 'freebies' on the ebook version of it? If so, please spare a moment to take the following short quiz: 1. Does the cover of your preferred historical reading matter traditionally feature either a woman in danger of a 'wardrobe malfunction' or a man who has misplaced his shirt (or at least his buttons), or both? 2. When you say to your friends, "Oh, I just love Mr. Darcy!" are you, in fact, thinking of Colin Firth jumping into a BBC fish pond, rather than Jane Austen's intricate creation, who had been 'a selfish being all his life, in practice, though not in principle'? 3. Do you deplore the fact that Jane Austen was herself the daughter of a clergyman, and that, however delightfully ironic her writing and witty her observations, she insisted on adhering to the somewhat priggish view that a charming rake was not a hero, but a villain--and also demonstrated other symptoms of 'outdated morality'? 4. If you dutifully plowed through Mansfield Park, were you horrified to discover that Henry Crawford was not, after all, the hero? 5. And finally, like Winnie-the-Pooh, do you find it is "more fun to talk with someone who doesn't use long, difficult words but rather short, easy words like 'What about lunch?'"--and, perforce, more fun to read them, as well? If you answered yes to all, or even most, of the above questions, **DO NOT BUY THIS TITLE IN ANY FORM**. You won't enjoy it, and, thus embittered by this needless waste of your time and funds, your only satisfaction will be to write a scathing review of a book that was never intended for your delectation in the first place. From the back cover: The year was 1805; the place, England. Napoleon was scheming how to wrest control of the Channel from the British Navy so that he might at last invade the island "nation of shopkeepers" that kept interfering with his plans to dominate all of Europe. Lord Nelson was chasing the Emperor's fleet across the oceans in a hunt that would shortly culminate in the battle of Trafalgar. But on a quiet estate in Warwickshire, "just near enough to Stratford to take a proprietary interest in its immortal Bard," Ann Northcott was much more concerned with her mother's schemes. Those schemes would send Ann and her friend Julia Parry far away from their beloved Merriweather, on a turbulent voyage into a fashionable London season. For both of them, it would prove to be a journey of discovery into the true nature of Friendship and Folly.

Delightful surprise

By Miz Waller

I love Regency romances and have a high standard for the ones I consider "keepers". I don't really like the Jane imitators and don't usually read them. Forget all of these snide remarks of mine and settle down for a great read with "Friendship and Folly". When you find a book that made you laugh at loud, gnash your teeth, and tear up (not all at the same time) then you know you want to read more of that author. I'm only sorry that this seems to be the only book by Meredith Allady.

Worth it but not a romance

By Martinez

I'm surprised and not by the unabashed endorsement of the other reviewers. While Friendship and Folly is certainly an enjoyable read it is by no means a five star book, at least not when compared to truly good writing.

But I can totally see this author getting better, more polished and really achieving writing worth of fandom. The book's best attribute is its characters, especially Ann and Clive from whom the funniest lines and the most human frailty come from.

I also enjoyed the unhurried descriptions and tangents the story takes now and again. The writing style is evocative of Austen and Heyer but not even approaching the level of these literary giants. Though I'd definitely read another book by the author. I liked it. I liked it very well. And I might even reread it, which is the highest compliment I can pay it.

The three things I took issue with are as follows:

The romance is not center stage. It's not even on stage.

It's wordy. So much so that I had to reread a few incredibly long run on sentences up to three times.

I wish Ann was the heroine, she is much more the stuff heroines are made of than Julia.

I don't know how to classify it, it's not romance, comedy of manners, drama, comedy. It's good, I just don't know what it is.

Go ahead, buy it, you'll enjoy it.

For those who care the language is clean and the bedroom door firmly shut.

Good, old-fashioned type of book

By Peanut

I really enjoyed this book! Obviously there will be a second book forthcoming, probably with Anne having her own romance...It's written something in a style similar to Jane Austen and Georgette Heyer...A sort of comedy/romance.

I was really pleased to finally find another book by Meredith Allady today available for free Kindle download at Smashwords! It's called "Letters from Bath; Or, A Friend in Exile". I haven't read it yet but am hoping it will be as good as "Friendship and Folly"!
