INTERNATIONAL RELATIONS AND THE "THIRD DEBATE": POSTMODERNISM AND ITS CRITICS BY DARRYL S. JARVIS, DARRYL S. L. JARVIS PDF

Jarvis provides a collection of essays designed to survey the issues, debates, themes, and points of contention surrounding postmodernist and poststructuralist thought in international relations and the Third Debate. It serves as an introduction to these new theoretical mediums, and as a critique to highlight weaknesses, problems, or concerns that arise in the context of perspectivism, interpretivism, postfoundationalism, relativism, ethics, and knowledge. In the fullest sense, the essays are concerned with assessing what postmodern and poststructural theories can contribute to international relations and the study of world politics.

The approach of Jarvis and his contributors is exploratory as well as pedagogical. They anticipate that explorations into the conundrum of understanding and explaining world politics will help students and other researchers beginning their own such investigations to form some tentative questions and, perhaps, even answers of their own. Provocative reading for scholars, students, and other researchers involved with political science theory and international relations.

Within the Narrow Framework

By A Customer

Jarvis provides an excellent analysis of the so called postmodernist approach in IR theory. However the question is to whom does this 'excellent analysis' deserve. Although this book provides a review of the postmodern school, due to the naive epistemology present in the text, it fails to go in deep and explore the 'postmodern' approaches (treated as a singular voice). The commitment to a strong empiricist epistemology is hidden beneath every paragraph, and this is the major weakness of the book: Judging the other within one's own shoes.

If you deploy a 'conventional' approach to IR theory then true this book will find it's place in your footnotes as a legitimate reason to dismiss the 'po-mo' intervention. However do acknowledge that this would not go beyond the fact of its assertion. If you deploy a so called 'critical' approach, than this book will serve you as a classical example which follows the footsteps of Robert Keohane's naive categorization of alternative theories in International Relations.
