This Man & Dinosaurs: Coexistence The Evidence By Stephen Johnson can accompany you during that time. It will not make you feel weary. Besides, by doing this will certainly also boost your life top quality.

# MAN & DINOSAURS: COEXISTENCE THE EVIDENCE BY STEPHEN JOHNSON PDF

Today, people are taught that dinosaurs roamed the earth 65 million years ago and mysteriously died out after a comet hit the earth. Then over millions of years those that survived evolved into birds of today.

This idea, though taught in nearly every school and major university has not been supported from history or the geologic record.

It gives no explanation for the vast fossil graveyards found throughout the world, nor does it explain how many animals found in the fossil record, remain alive to this day.

Is there a better explanation? Is there scientific and archaeological evidence to explain what happened to the dinosaurs?

In this book you will be given evidence that dinosaurs have always existed with man.

Ancient man frequently wrote of their interactions with dinosaurs throughout recorded history, and there is evidence of this. You will also see evidence that some dinosaurs have survived to the present day.

Finally we will examine the most accurate and trusted historical record known to man, the Bible. The Bible gives a far different version of what happened in the history of ancient man, and what caused the extinction of most dinosaurs. We will look at its claims in light of the evidence that will be presented in this book.

Before we begin, consider this. We all have beliefs and ideas to what we think, is true. These are called our presuppositions.

Sometimes our presuppositions are true and sometimes they are false. When considering evidence it is very difficult to set aside presuppositions that we hold and look at evidence with an unbiased open mind.

Truth is sometimes very hard to accept especially if it is contrary to what we have believed.

Much of the evidence that you will see in this book has been ignored by modern science. But a close examination of the evidence will reveal some startling conclusions.

Evidence of Something

By DrJonesDrJones

This is the sort of book that gives self-published authors a bad name. For a book that claims to give evidence, the lack of attribution for his sources is stunning. There is no indication that any of the images are used with permission and there are large sections that are copied from others' work in a manner that resembles plagiarism.

I've always known dinosaurs and men existed at the same ...

By K. Williams

I've always known dinosaurs and men existed at the same time. Just the other week I got a free dinosaur with my purchase of a dozen donuts. The barber was also giving dinos out when you got a haircut. When Dinosaurs Came with Everything (Junior Library Guild Selection)
