Photos of Tsavo East

By Dr

I have reviewed several books by this wildlife photographer and filmmaker.i was not impressed.

This one is better and gets 3 stars.

There is a good collection of photos of elephants.

A variety of other mammals get 1-3 photos, some reptiles like Crocadiles, a monitor and a lizard also feature.there are several bird photos as well.

The photos are crisper, and often have the animal in it's environment-- in some of his other books the photos are closely cropped. The author appears to be Dutch. This leads to some unusual sentences and spelling errors. He gives very simple pointers on photography. The text is very simple and brief.

The map appears to be from an old guide book.

Summary

Overall I like this book more than several others by the author. May be worth considering
