(Reference). Centerstream presents this detailed look at the inner workings of the famous musical instrument manufacturer of Kalamazoo, Michigan before World War II. For the first time, Gibson fans can learn about the employees who built the instruments, exactly where the raw materials came from, the identity of parts vendors, and how the production was carried out. The book explains Gibson's pre-World War II factory order number and serial number systems, and corrects longstanding chronological errors. Previously unknown information about every aspect of the operation is covered in-depth. Noted historian Joe Spann gathered firsthand info from pre-war employees, and had access to major Gibson document collections around the world. Wonderful Gibson history

By Still Trying

Through no small effort, Joe Spann tells the history of the famous Kalamazoo factory, the workers who built instruments there, and he sheds new light on the instruments as well. Well researched and written, this book provides the best look yet into the legendary past of one of the world's greatest music companies.

a landmark project for "Gibsonites"

By Greg Earnest

The influence of Gibson instruments on American popular music cannot be overestimated, and neither can the importance of this new book by Joe Spann. After decades of guessing and speculation by all of us "Gibsonites" on so many questions related to the company's "golden era" before World War II, Joe's painstaking research and skillful writing present us with solid, documented information that opens a window into the history of the Gibson company. It's the next best thing to getting into a time machine and going back to Kalamazoo!

Best there is

By Rod Builder

Both a wonderful book on Gibson instruments, particularly banjos and the best of the reference sources on identifying pre-war instruments, again, primarily banjos. If you are interested in Gibson then you have to have this book.
