One of the most important books I've read

By MikeJ09

This book is one of the best books I have ever read. The theories that the author includes are extremely well supported, as well as being very well explained, even for the lay person with no technical background. The current theories about gravity, time, as well as energy are shown to be either wholly incorrect or to be insufficient. The author's theories are founded on the science of soft particles and how they are the key to understanding how physics really work.

The Ultimate Reality is the second up-to-date version of The Awesome Life Force by Joseph Cater.

very strange

By Z. GOULET

First impression annoyed me that the "review" on the back cover of the book is by the publisher. The information presented is interesting, but the author has an irritating writing style. He comes off as a drill Sargent, barking at the reader that such and such is undeniably true. He doesn't say anything like- "this could or could not be true not enough testing has been done but it is likely that..." Everything he writes is true just because he says so. This book could use more illustrations too, since a lot of the information is intended to go with the reader's imagination. radical book though. A bit too scientific for the right-brained reader.
